

CYBERSECURITY SOLUTIONS & SERVICES

Presented by Orblogic

ABOUT ORBLOGIC

Innovative provider of AI-driven business and cybersecurity solutions.

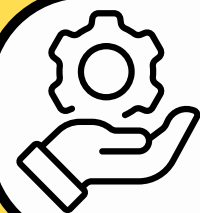

Who We Are

Leading provider of AI-powered business solutions.

Mission Statement

Empowering businesses with intelligent automation and security.

Industries We Serve

HR, E-Commerce, Finance, Healthcare, and Customer Support.

CYBERSECURITY SERVICES OVERVIEW

Cloud Security Architecture (Azure, AWS, GCP)

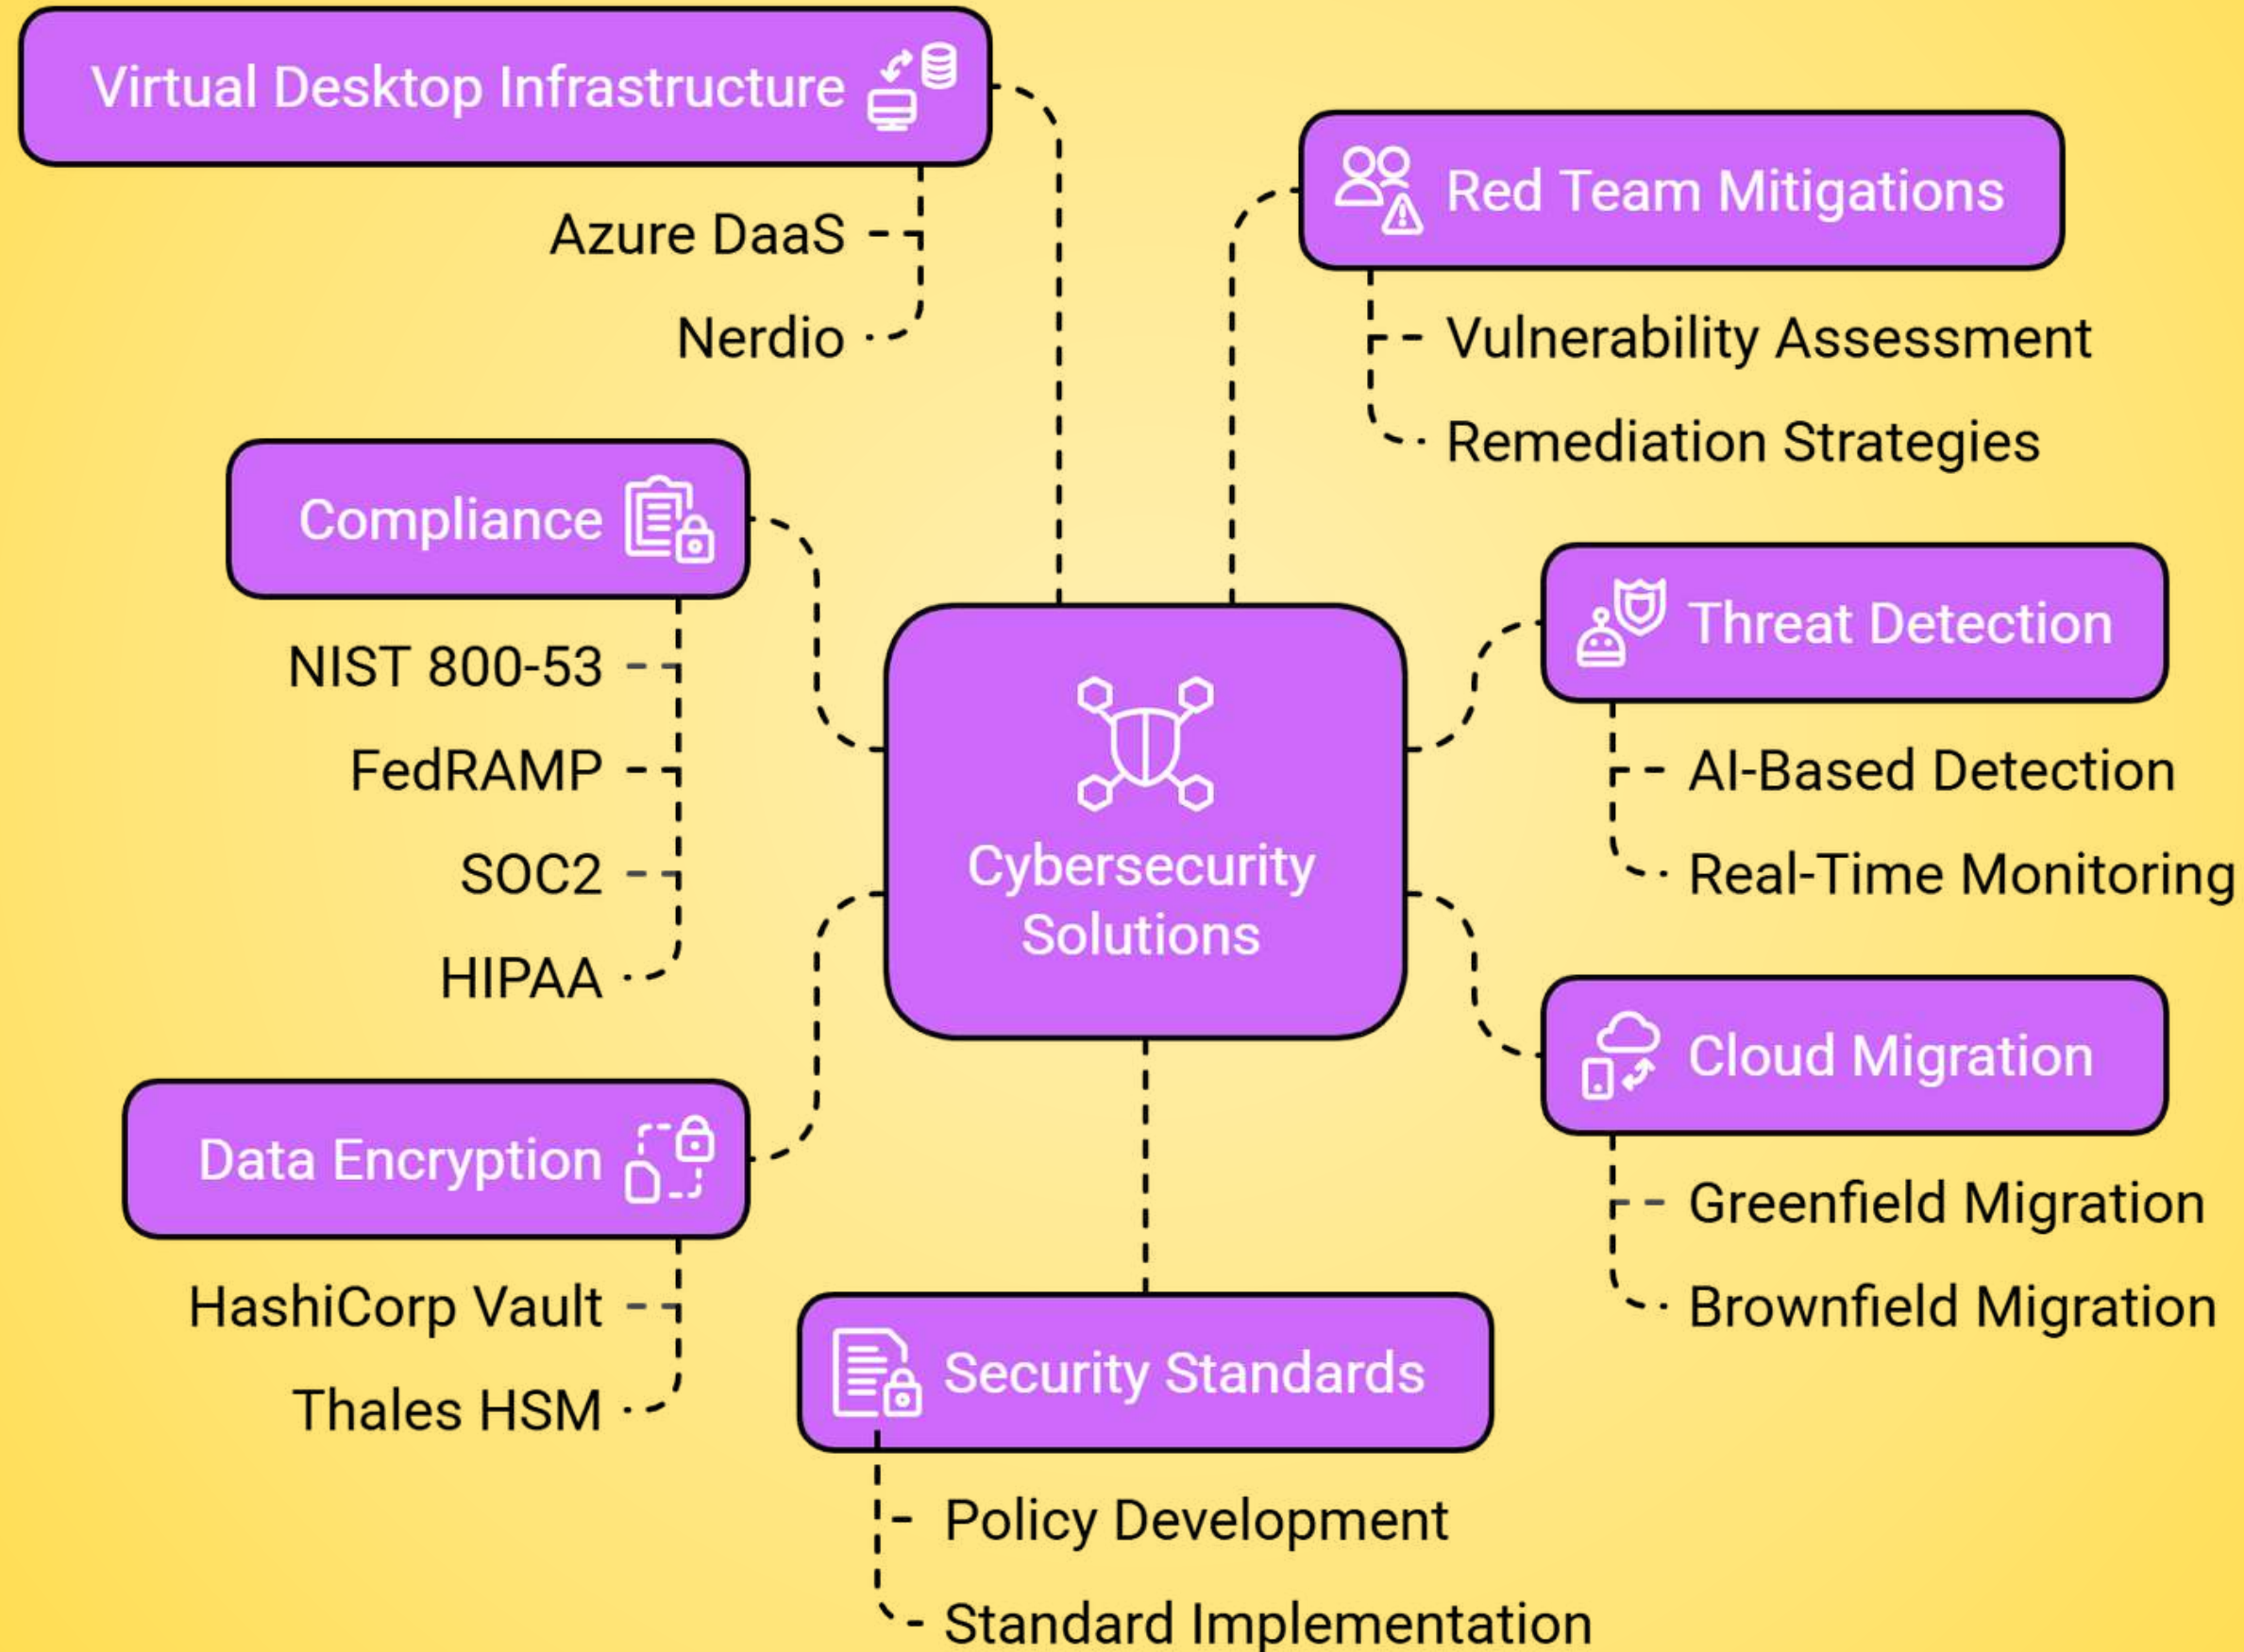

Threat Modeling (STRIDE, IriusRisk, MS Threat Modeler)

Zero-Trust Architecture & Privileged Access Management (PAM/PIM)

SIEM Integration (Azure Sentinel, Splunk), Security Scanning (Wiz, Tenable)

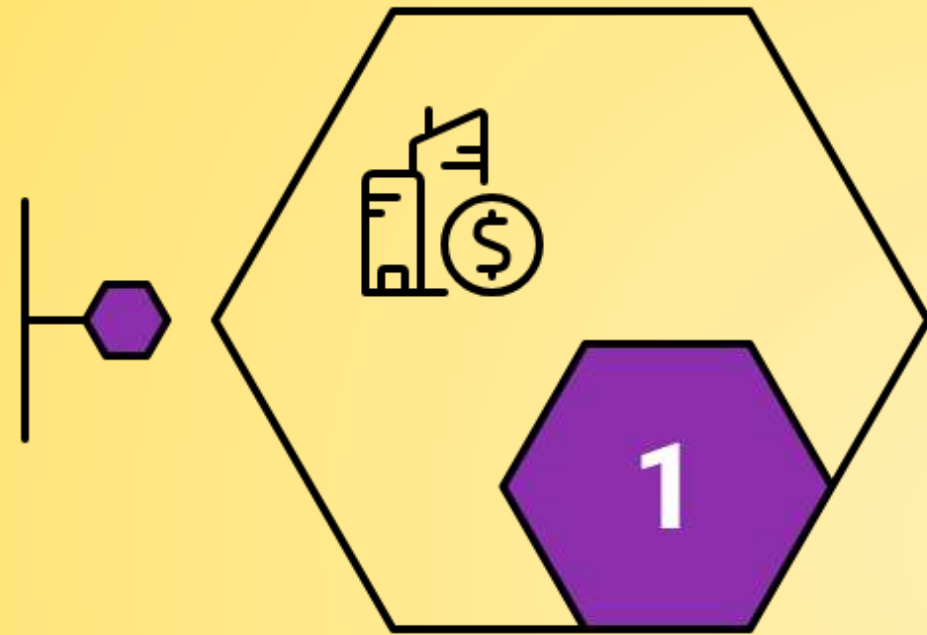

Disaster Recovery & Business Continuity Planning

KEY SOLUTIONS WE PROVIDE

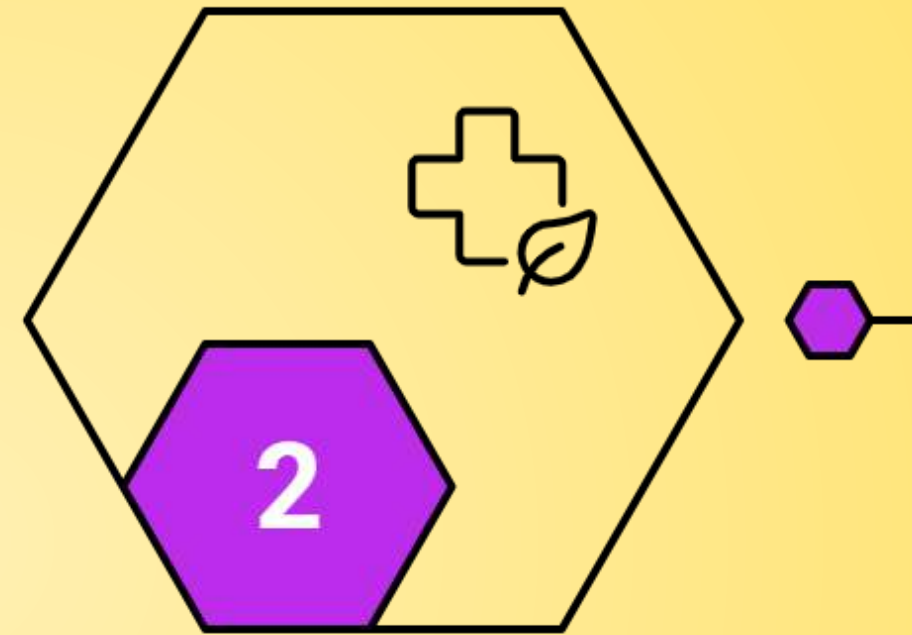

CYBERSECURITY USE CASES

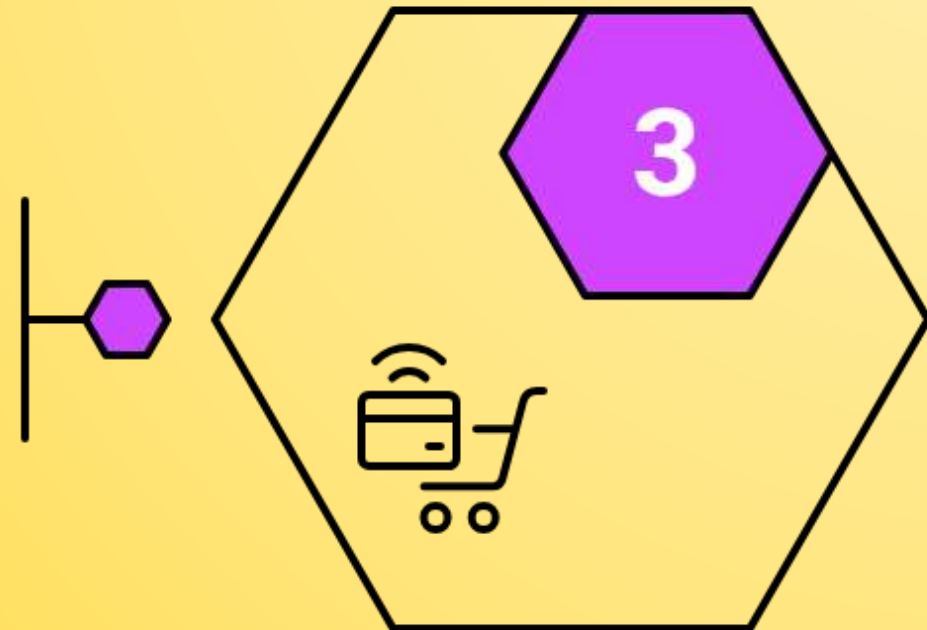

Finance
Cloud infrastructure
for banks like JPMC
and UBS

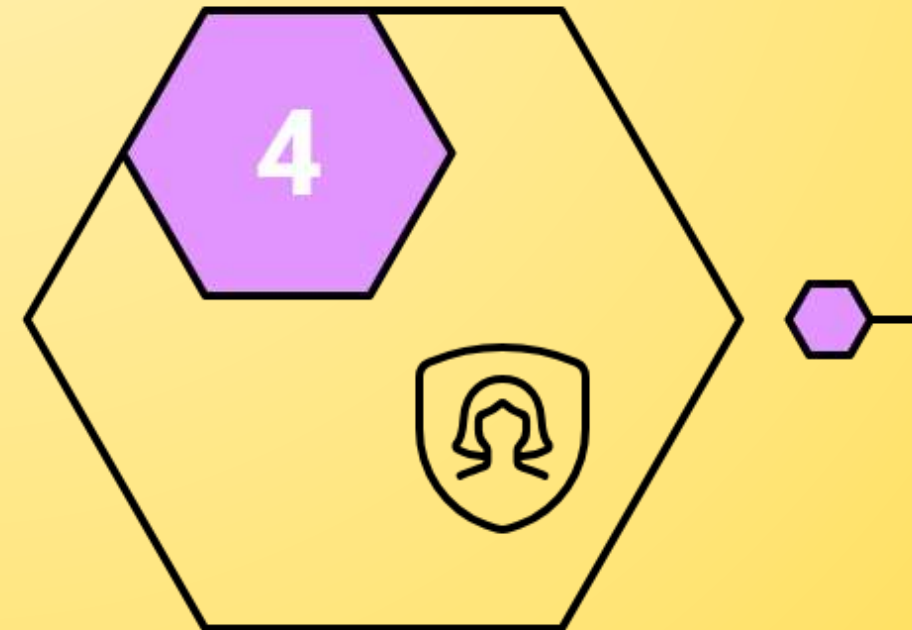

Healthcare
Compliance-driven
cloud adoption
(HIPAA, NIST)

Retail & Telecom
Fraud detection,
secure deployment

Government
Zero-trust adoption,
data protection

OUR COMPETITIVE ADVANTAGE

Proven Success

Track record of success in industries.

Tailored Frameworks

Customized security solutions for each client.

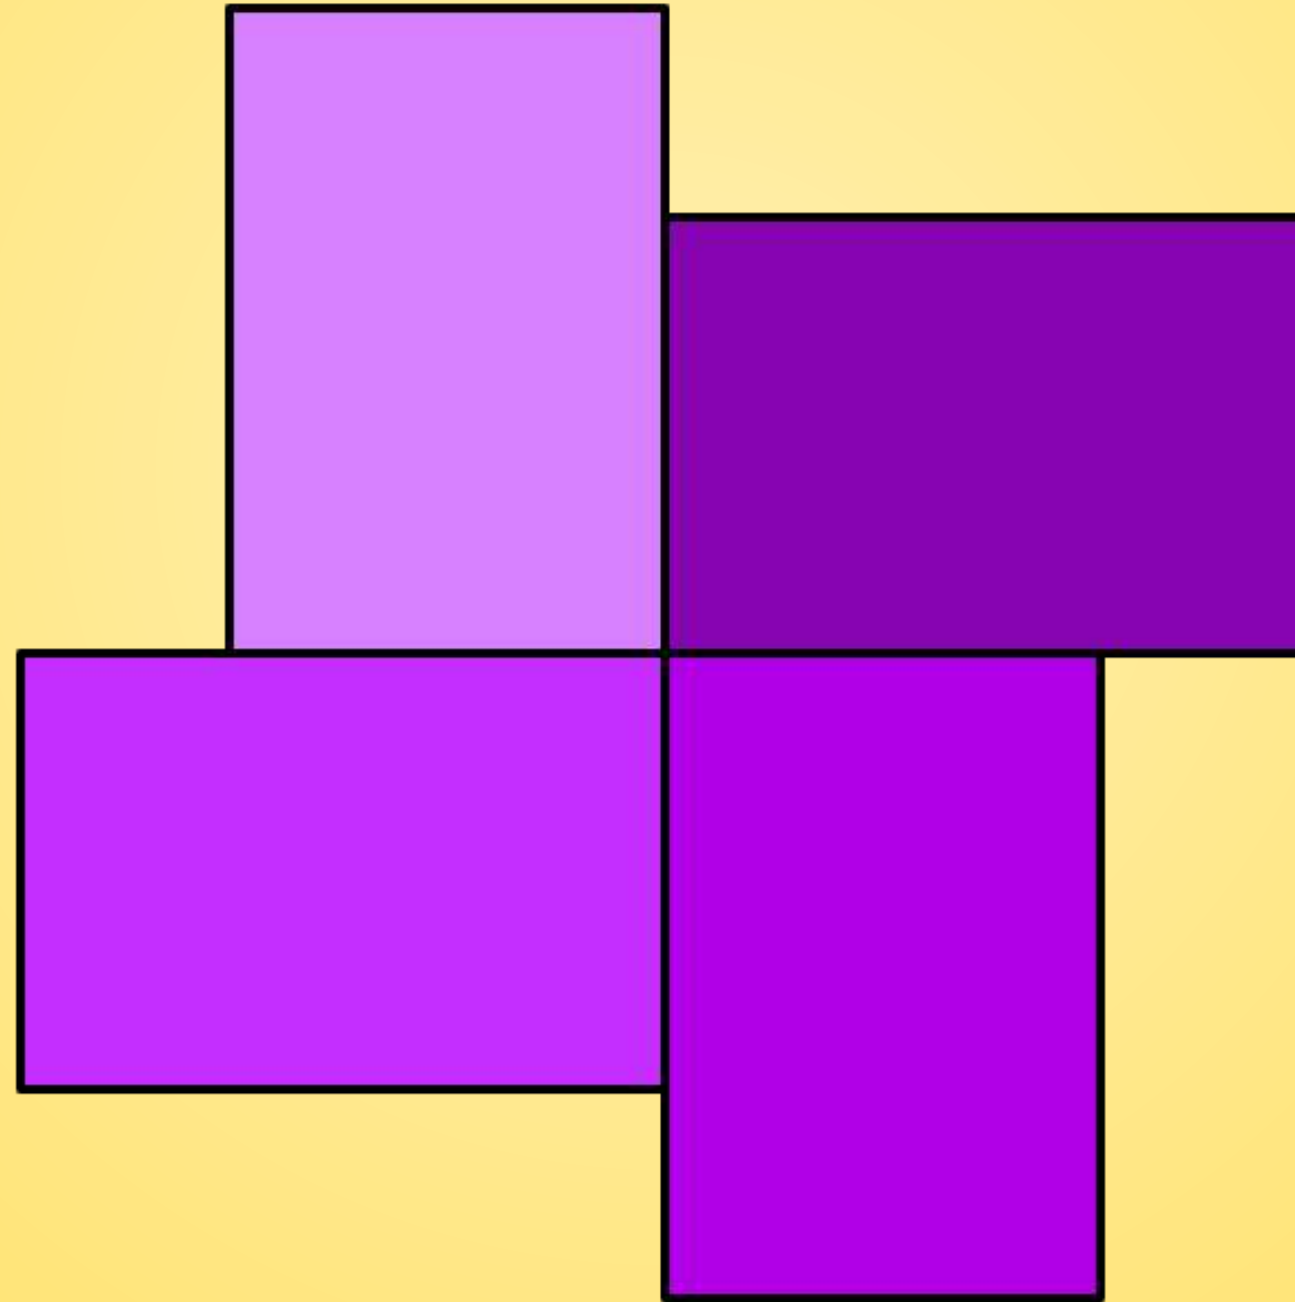

Cloud Security Expertise

Multi-cloud platform security proficiency.

Advanced AI

Cybersecurity powered by artificial intelligence.

CLOUD SECURITY ARCHITECTURE EXPERTISE

Cloud Design & Implementation

Expertise in designing and implementing secure architectures for major cloud platforms like AWS, Azure, GCP, and OCI.

Secure Architectures

Building secure landing zones, microservices, and clustered architectures to protect cloud environments.

Resilience Strategies

Implementing high availability, fault tolerance, and disaster recovery strategies for cloud-based systems.

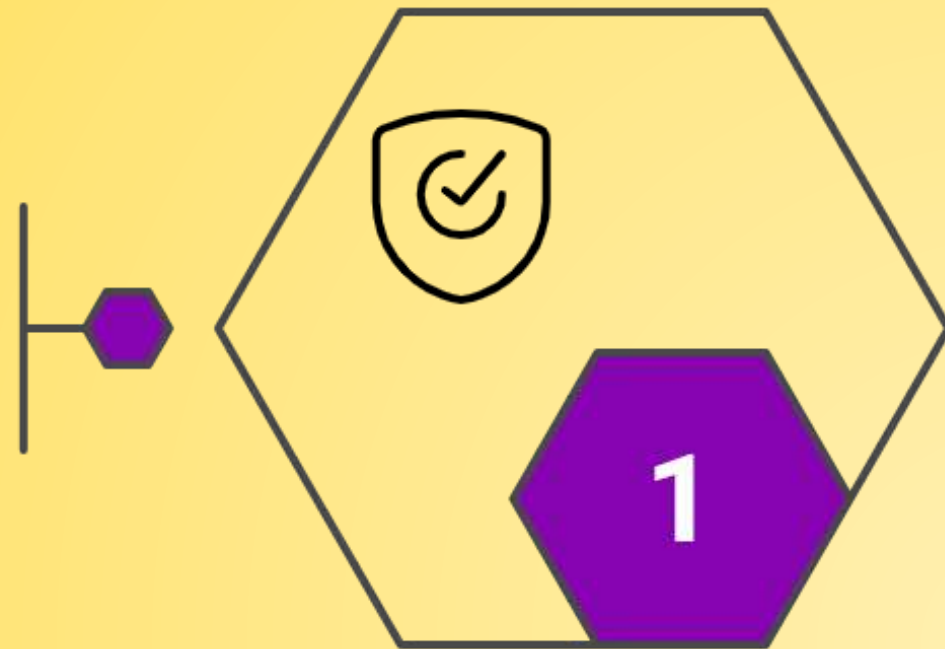

Migration Expertise

Experience in both greenfield and brownfield cloud migration projects, ensuring a smooth and secure transition.

SECURITY CONTROLS & FRAMEWORKS

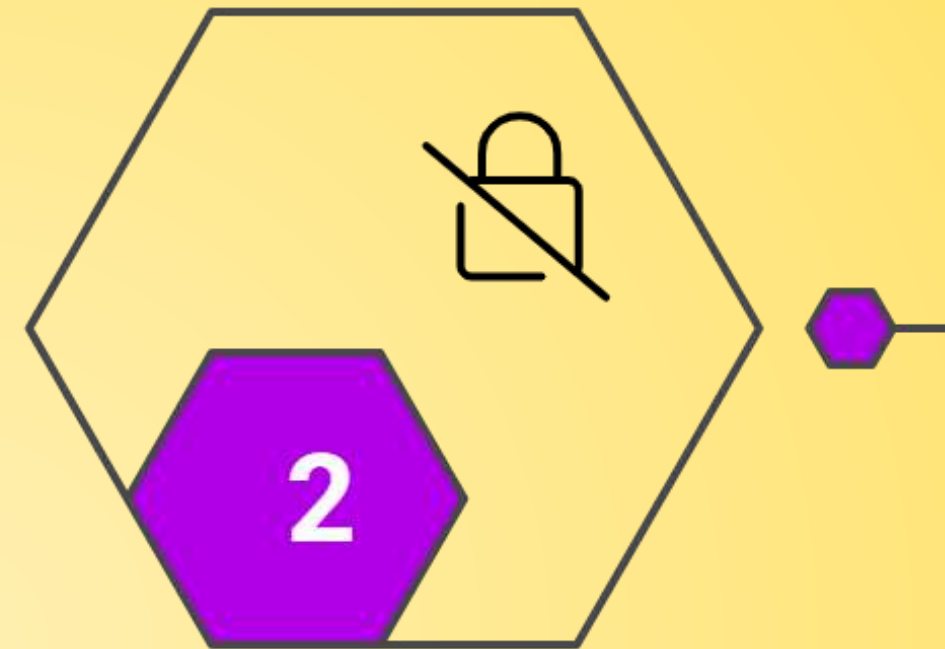

Security Frameworks

Industry standard security frameworks and guidelines.

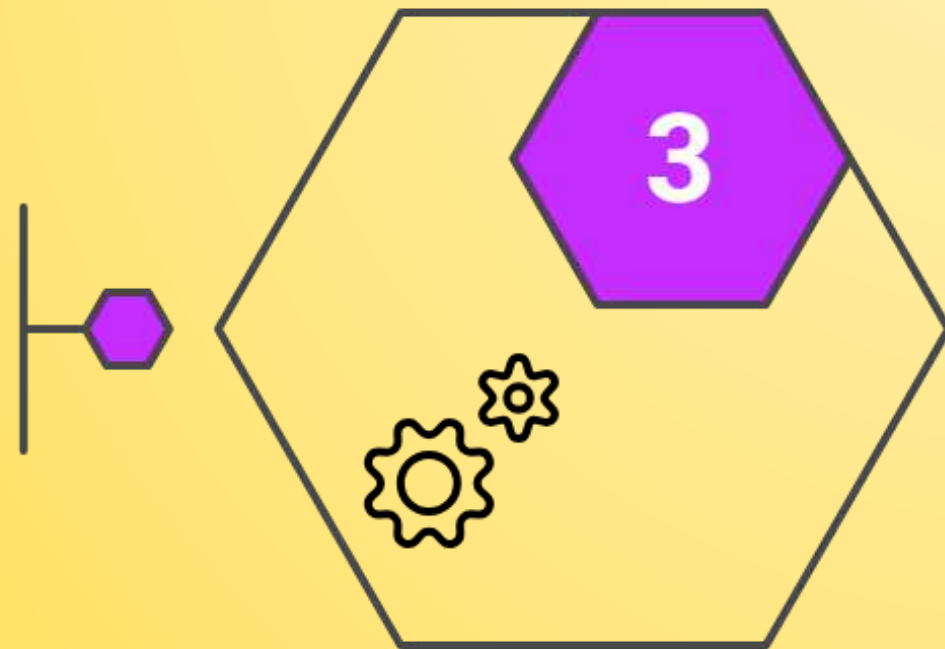

Zero Trust

Implement zero trust with PAM/PIM.

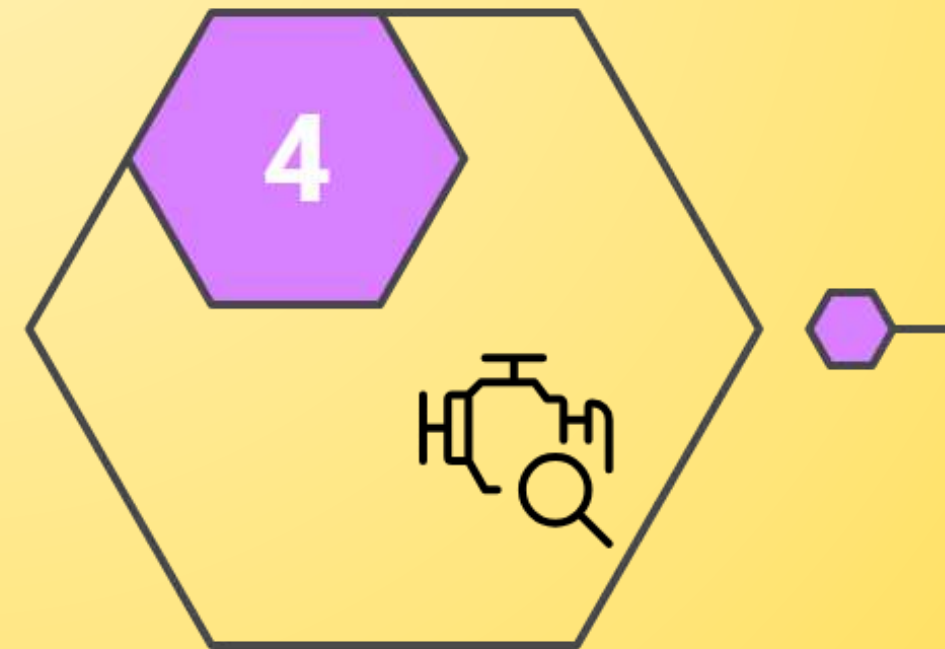

Custom Policies

Tailored policies for multi-cloud environments.

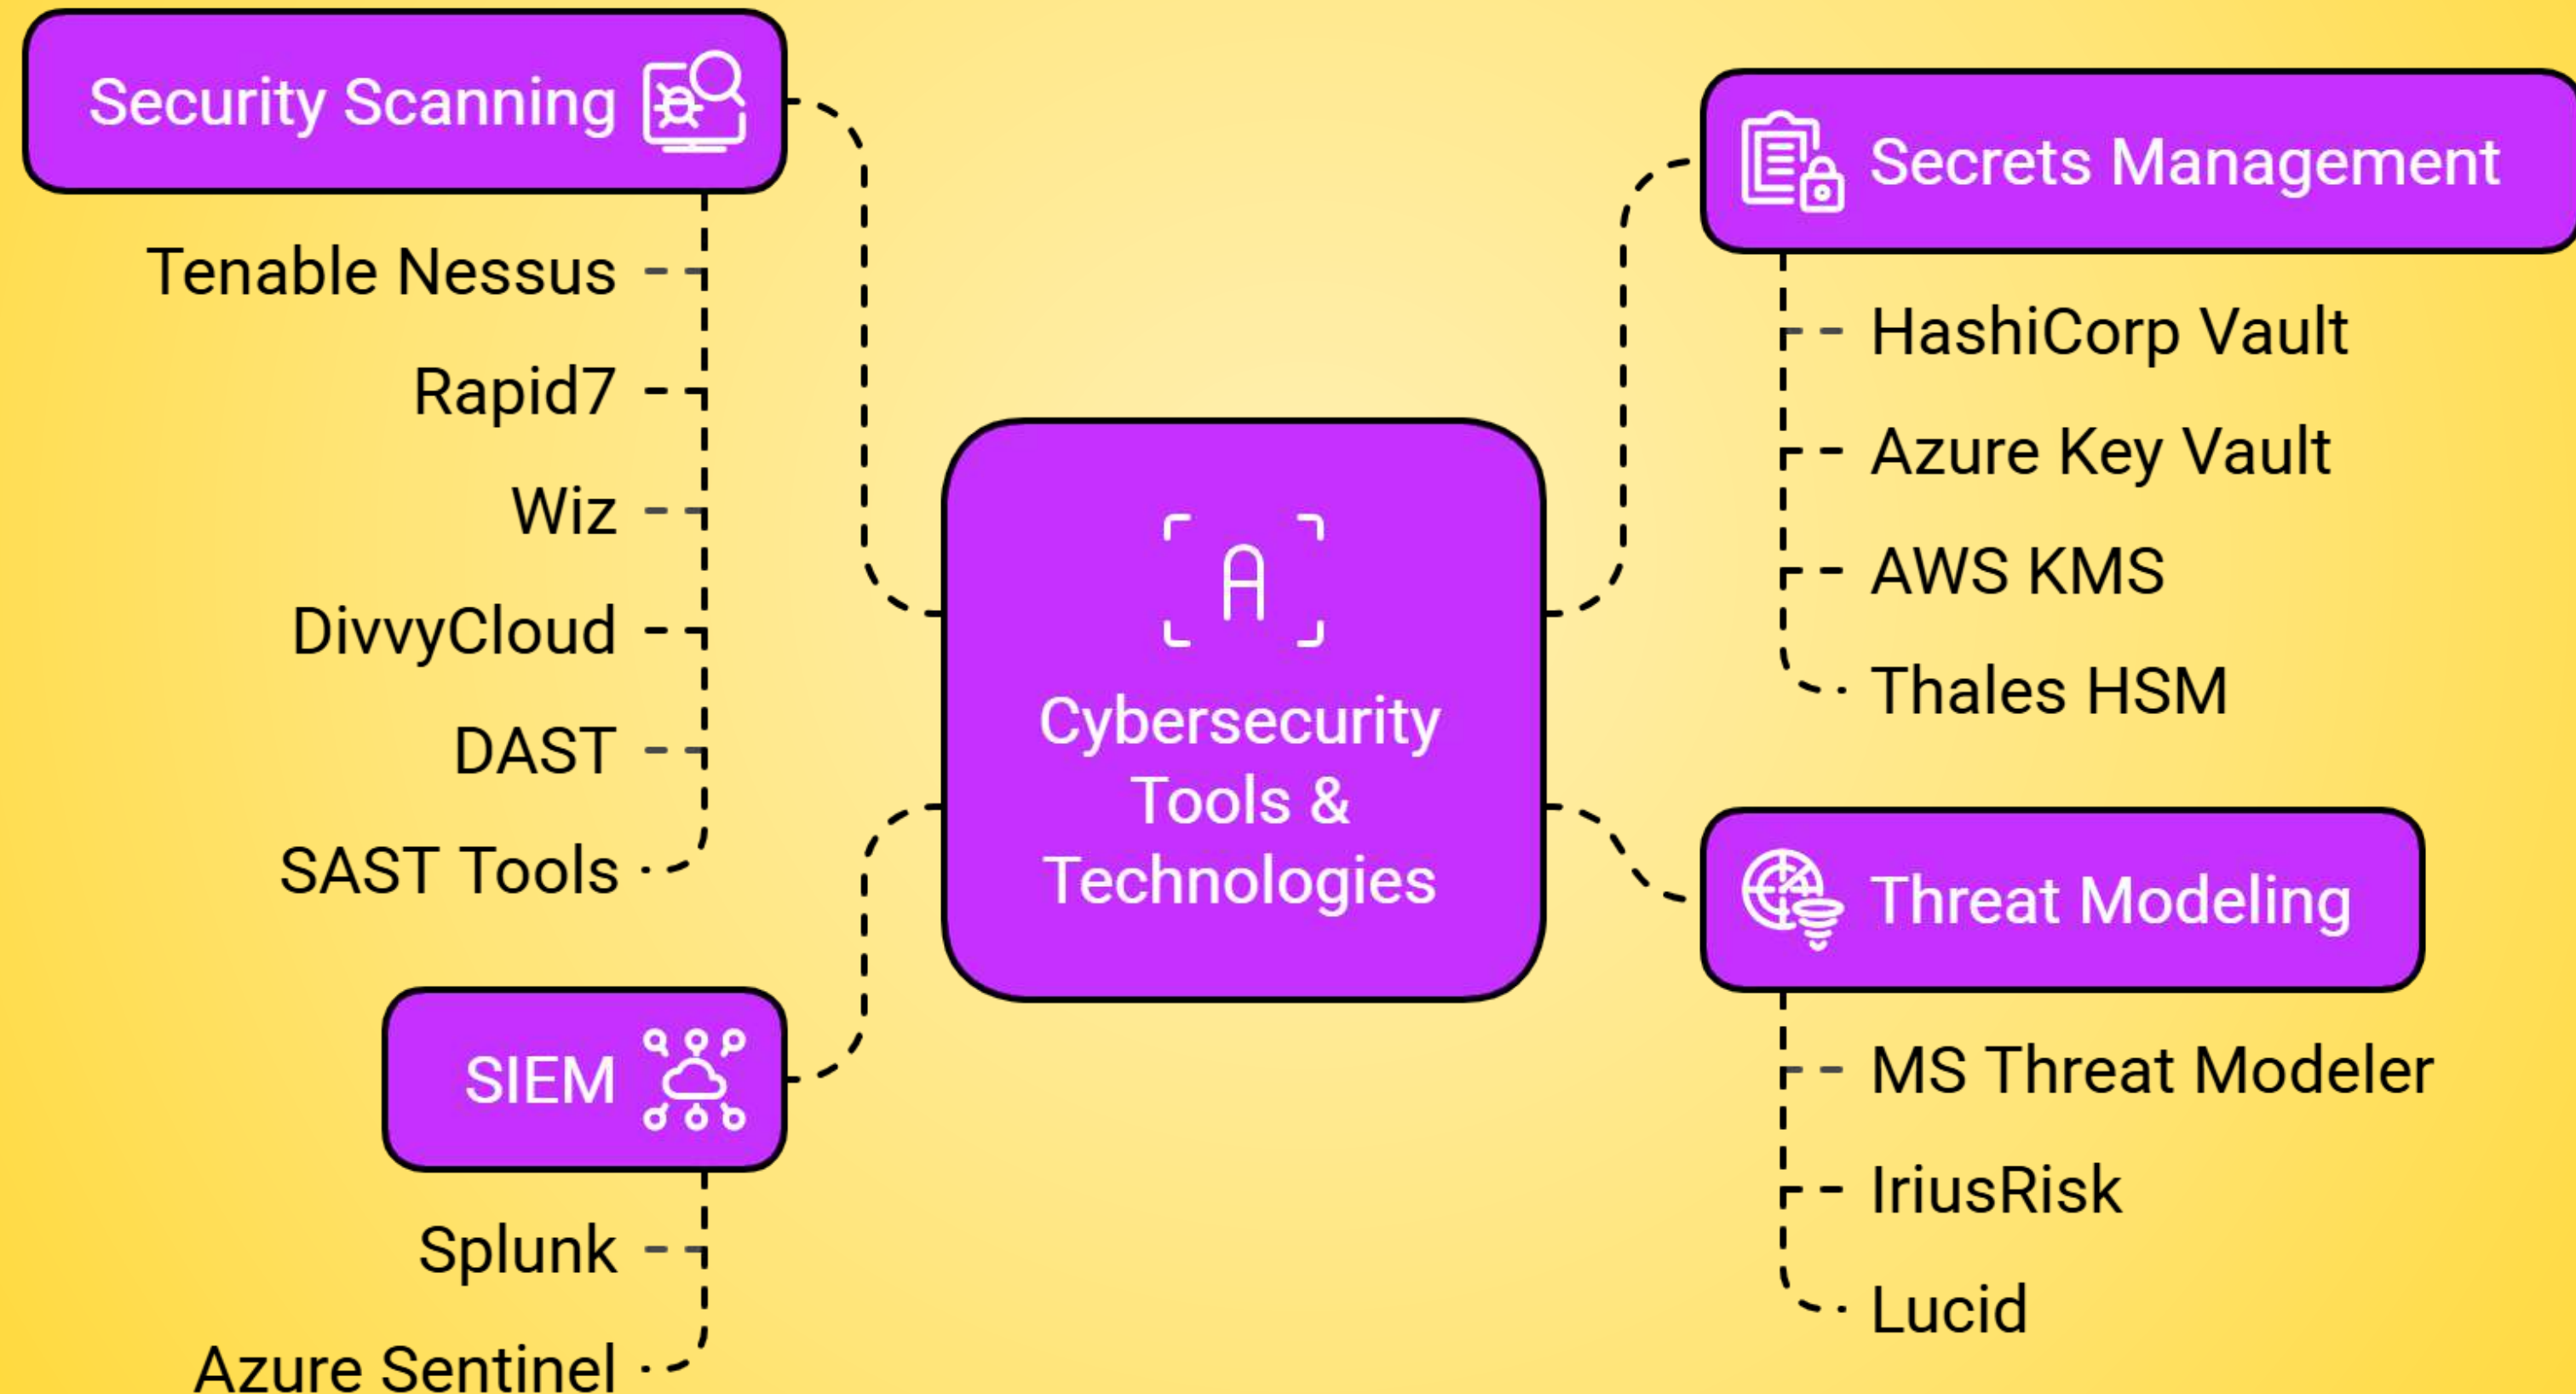

Control Types

Directive, Detective, Preventive, Reactive Controls.

TOOLS & TECHNOLOGIES USED

SAMPLE CLOUD TECH STACK

(AZURE & AWS)

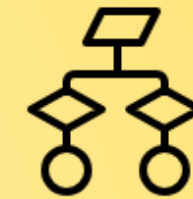

Azure Technologies

Azure offers services like AKS, AD, and Key Vault. These provide container orchestration, identity management, and secure secret storage.

AWS Technologies

AWS includes services like EC2, EKS, and RDS. These offer virtual servers, Kubernetes, and managed databases.

Integration Technologies

Integration technologies include API Gateway, Azure API Management, and Data Factory. These facilitate communication and data flow between services.

COMPLIANCE & GOVERNANCE

Audit support

Readiness and
documentation
assistance

General

ISO27001/2/17/18, CIS
Benchmarks
compliance

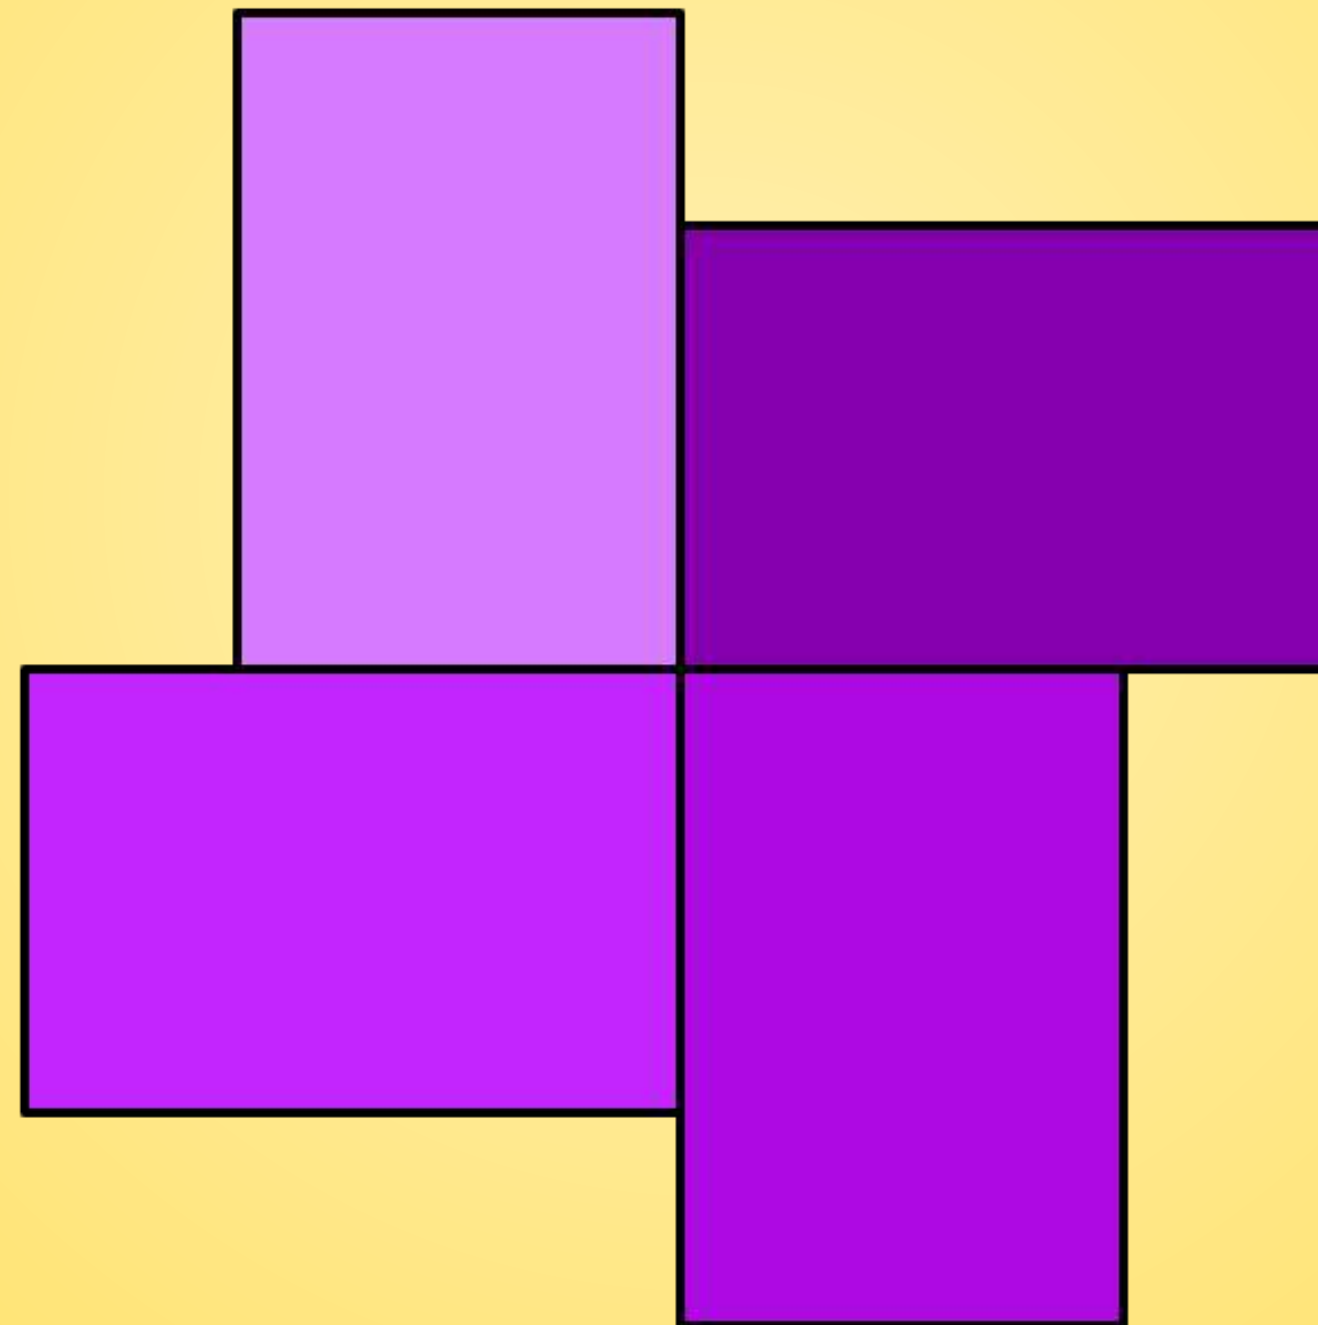

Healthcare

HIPAA compliance

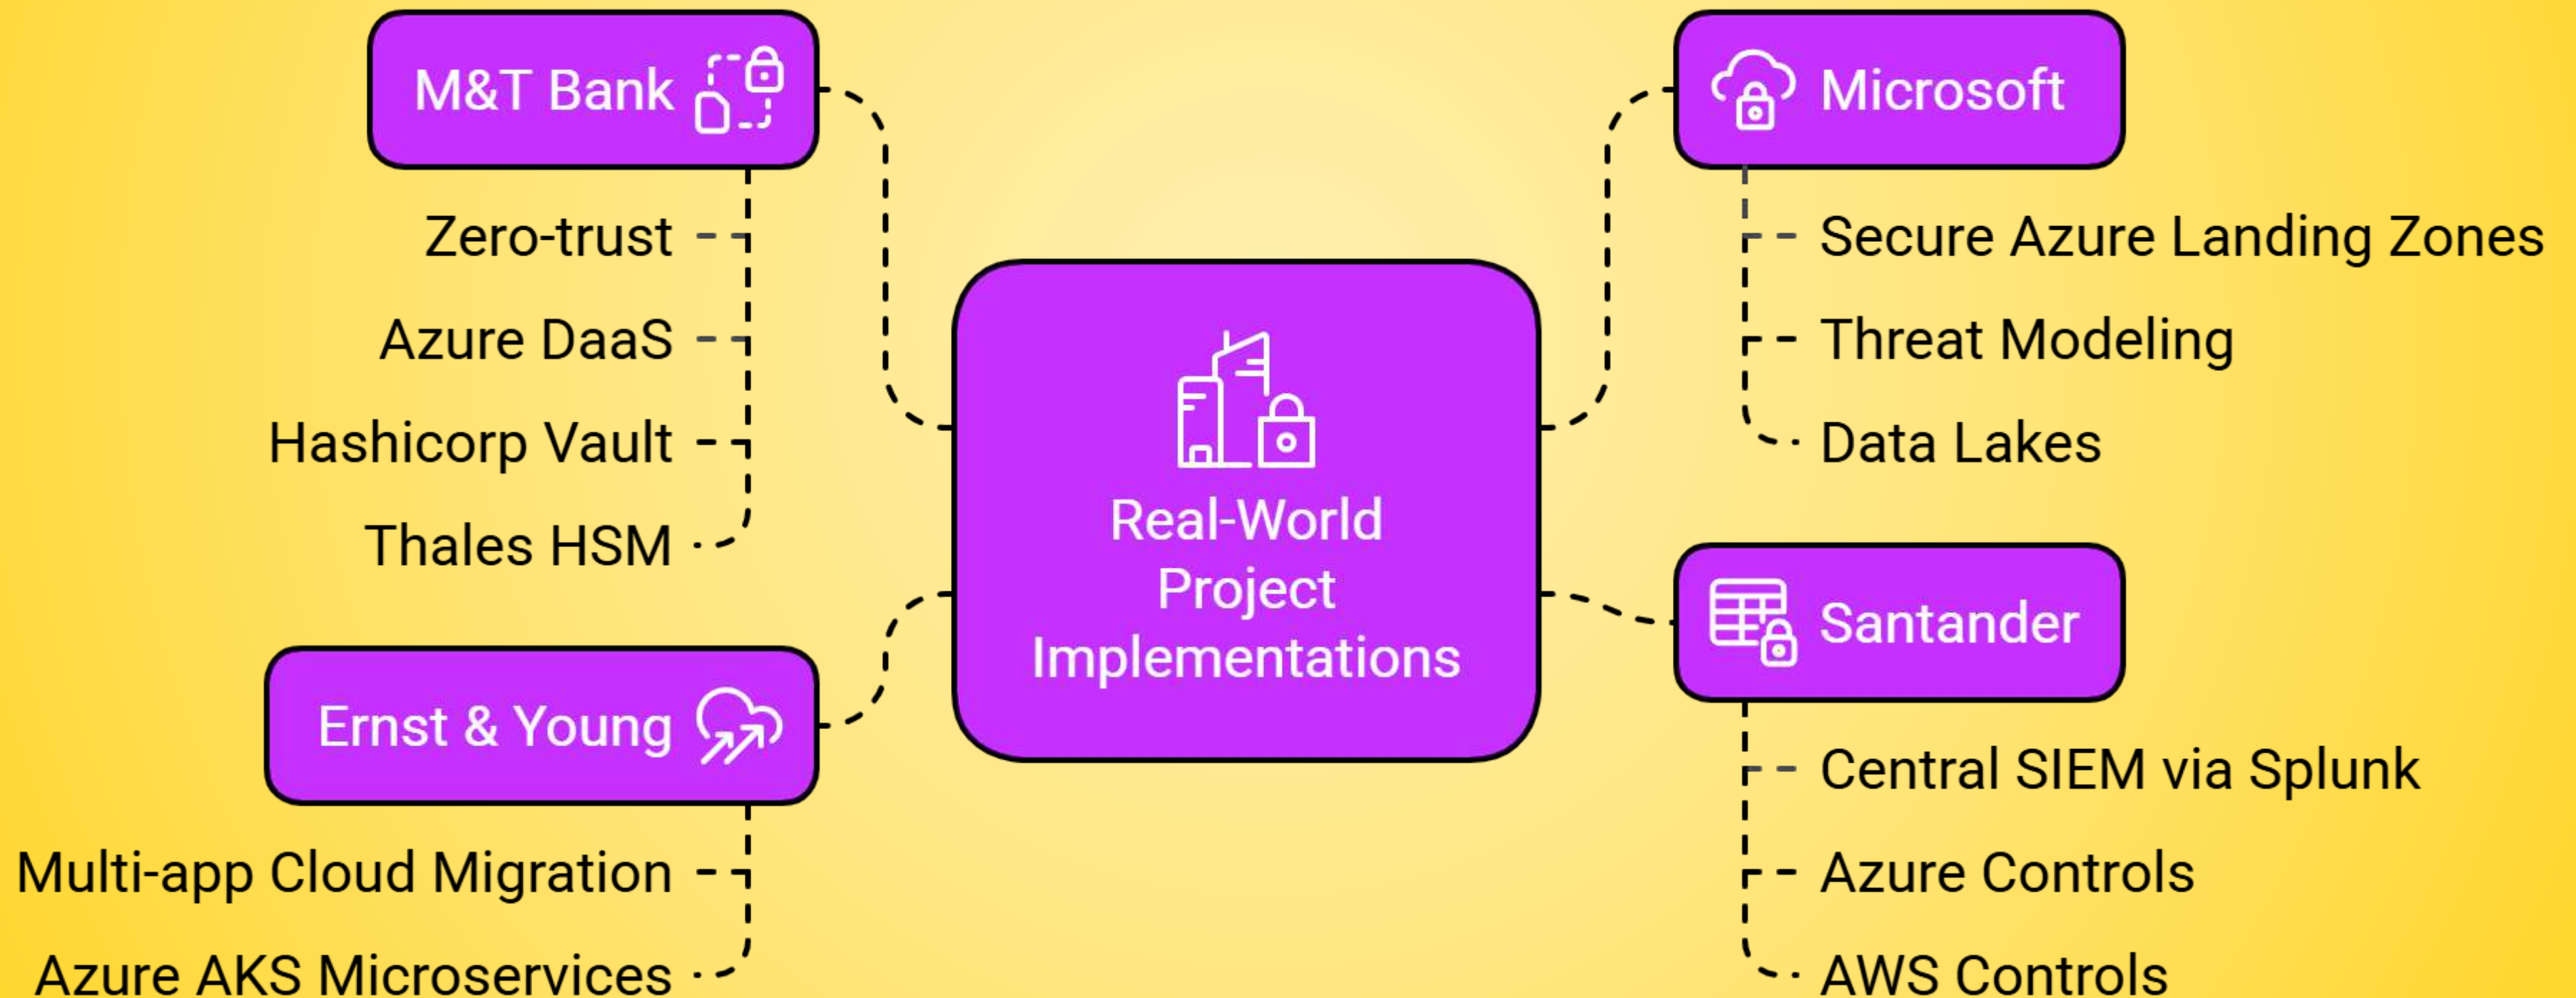

Finance

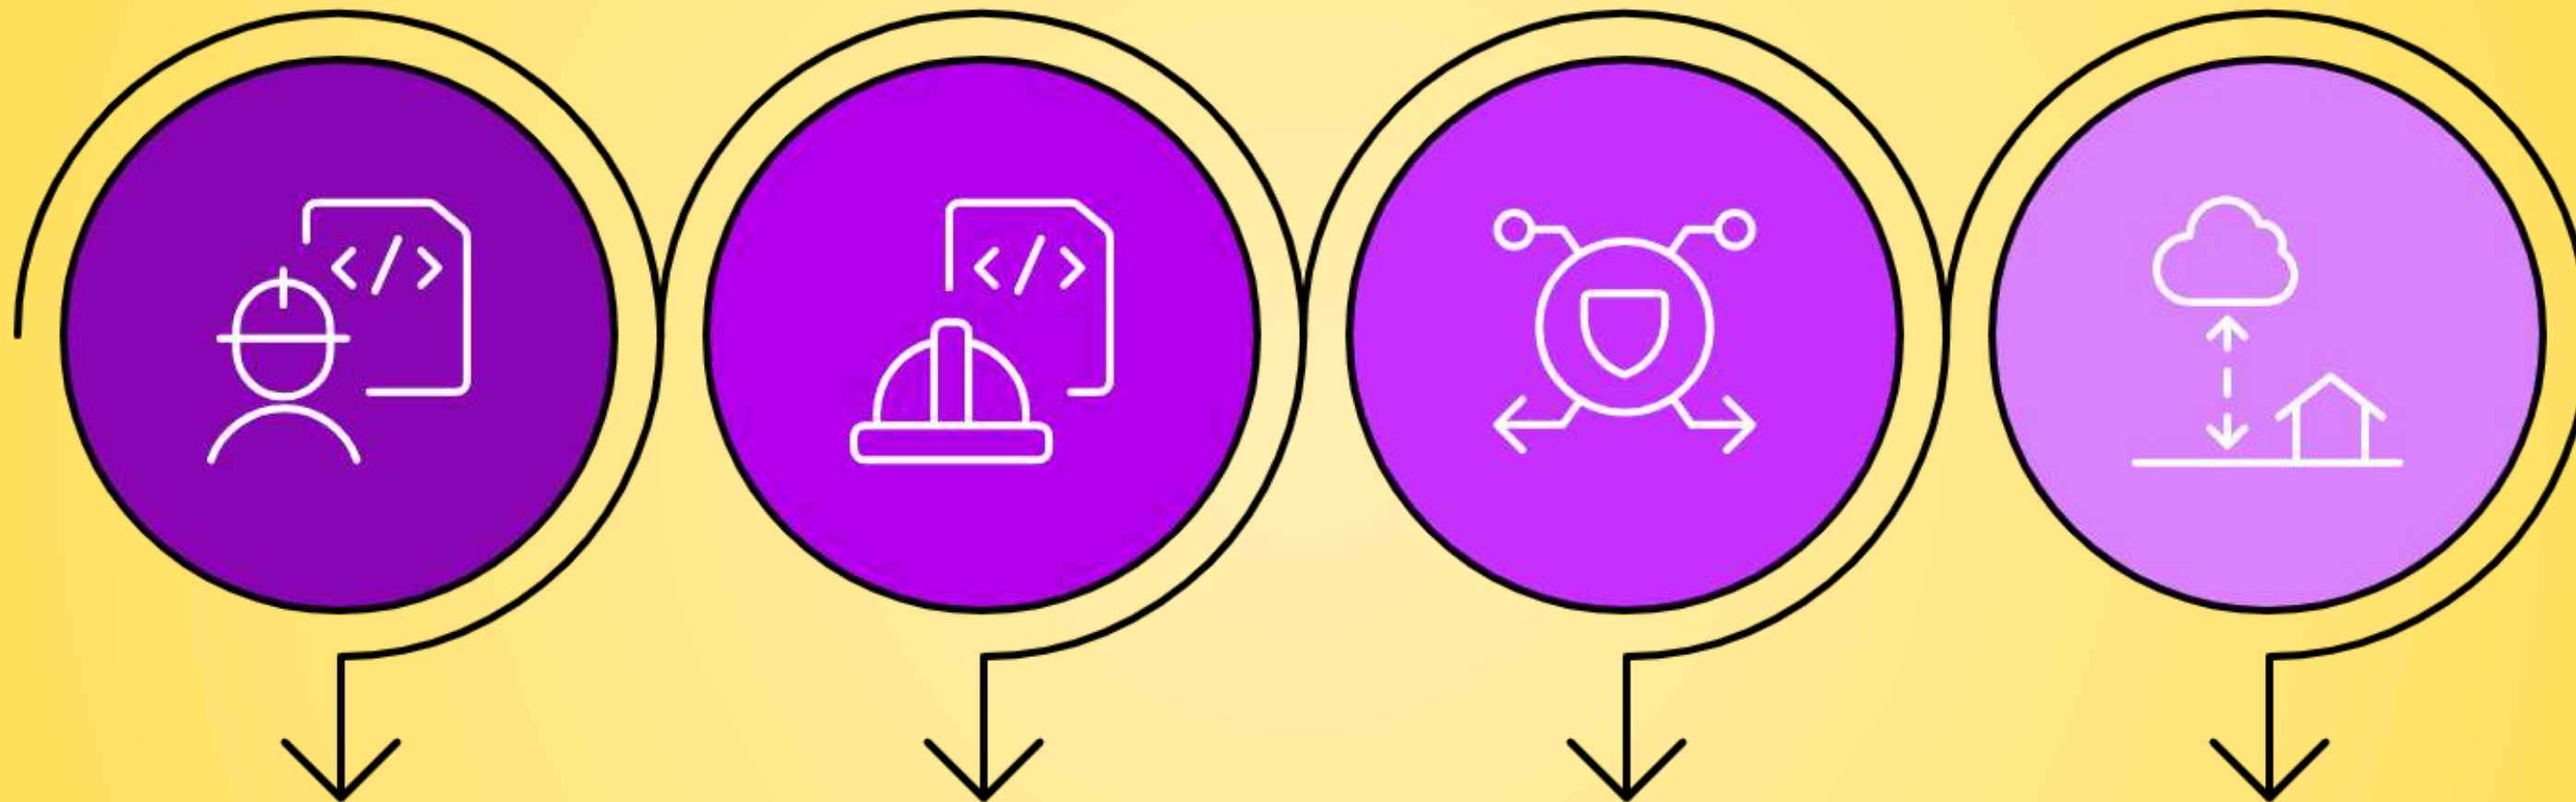

PCI-DSS, SOX, FedRAMP
compliance

REAL-WORLD PROJECT IMPLEMENTATIONS

METHODOLOGIES AND DEVOPS INTEGRATION

Agile CI/CD

Agile and CI/CD with automation

Infrastructure as Code

Infrastructure automation using Terraform etc.

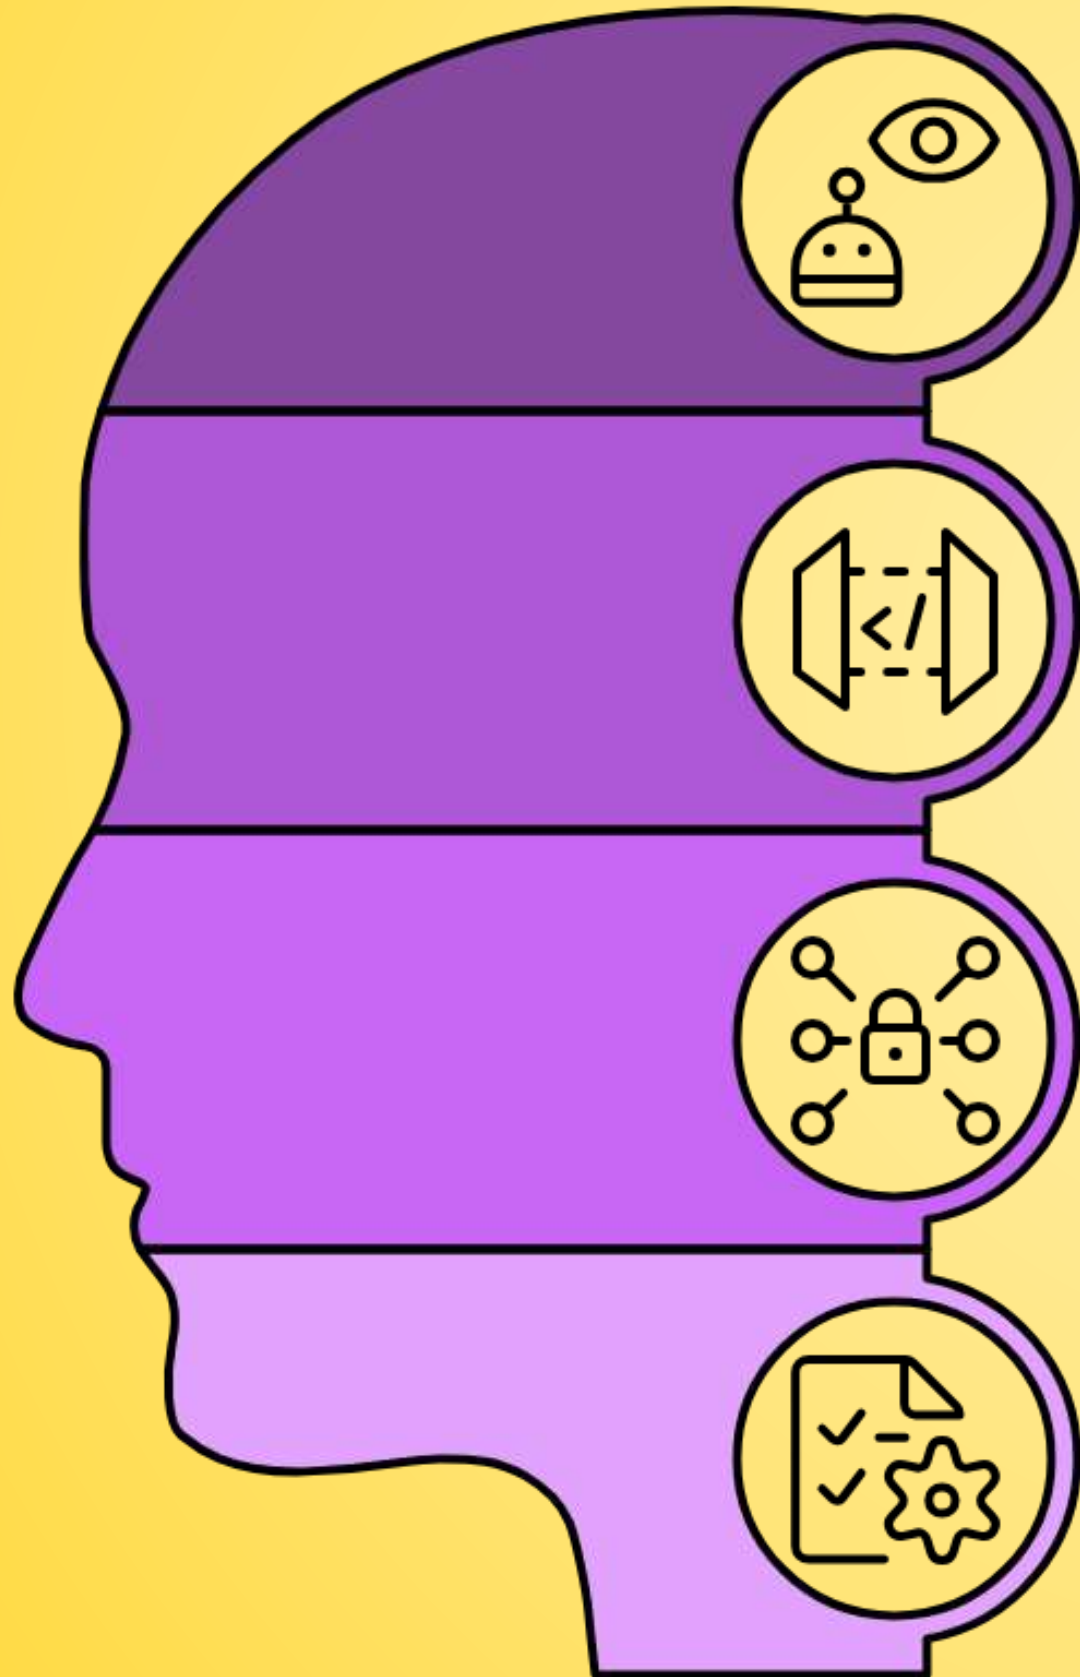

Security Embedding

Security integrated into DevOps practices

Containerized Deployment

Container deployment using AKS, EKS, Docker

CYBERSECURITY FOR AI SYSTEMS

AI-Powered Threat Detection

Utilizing AI to identify and monitor threats

Securing AI APIs

Ensuring the security of AI application interfaces

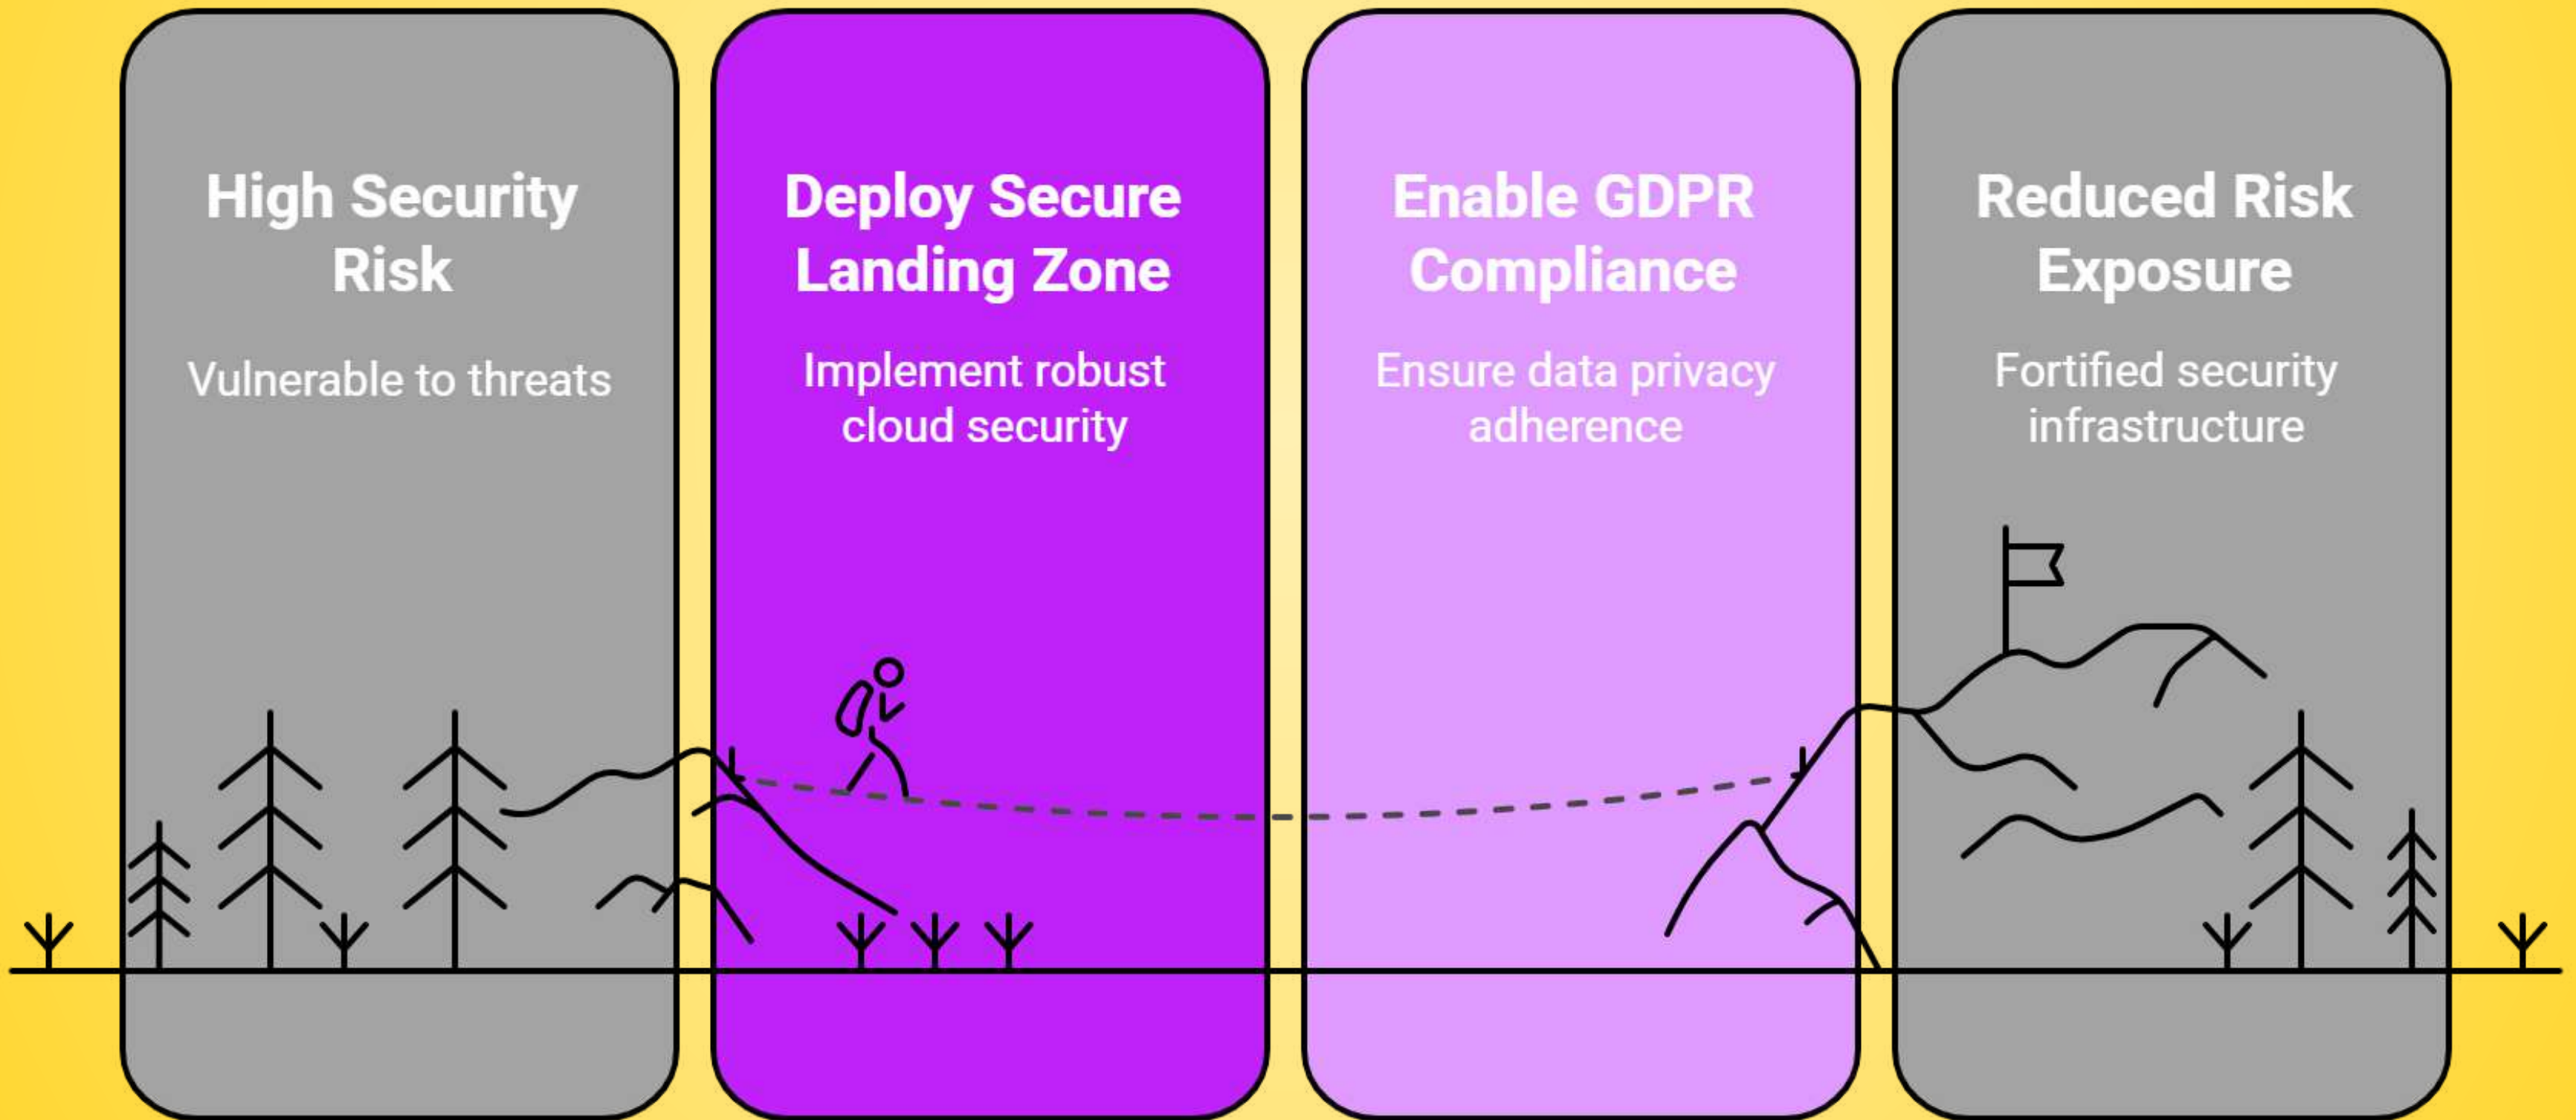

Protecting AI Models

Safeguarding AI models from adversarial attacks

Audit Trail and Governance

Implementing governance and audit trails for AI workloads
